独特而个性化的设计与项目壮观、自然的场景相符。

2007年,阿布扎比酋长国政府将一些位于阿拉伯湾的岛屿整合在一起,建立起了荒岛。普利斯设计集团为这个综合性度假胜地提供了设计、扩初和景观建设管理的服务,建成了沙漠度假村、一个海滨度假村、会议中心、马术中心和一个水上运动中心。通过红树林再生计划、自然树种增殖和植栽保留策略,岛上壮观的自然景观作为重要的生态景点得以保留和强化。

萨巴尼亚岛主要是一个野生动物公园,在这里各种各样已经被列入濒危和脆弱名单的阿拉伯动物被成功地繁殖和出口到阿联酋一些荒芜地区。

通过使用适当的景观元素,普利斯设计集团所设计的项目各自的特点得以强化。与敏感区域保持一定的距离,但沿海植物平台和木板路的使用创造出了强烈的视觉和物理联系,实现了与AL Yamm海岸环境的整合。

True to the project spectacular, natural setting, a unique and bespoke design was achieved.

In 2007, the Government of Abu Dhabi established the desert island, bringing together a number of islands in the Arabian Gulf. The integrated tourism destination features a desert resort, a beach resort, conference centre, equestrian centre and a water sports centre. The spectacular natural landscapes on the island, as the key ecological attention, are retained and enhanced, with an extensive mangrove regeneration program, native plant propagation and tree retention strategy.

Sir Bani Yas Island is predominantly a wildlife park where various species of Arabian fauna which had been on the endangered and vulnerable list have been successfully bred and exported to depleted regions of the UAE.

The unique characters of each of the settings for these projects were strengthened with the use of appropriate landscape elements. Integration with the coastal environment of AL Yamm was achieved by keeping a respectful distance from these sensitive areas yet creating a strong visual and physical link with the use of coastal plantings decks and boardwalks.
