AILA QLD Landscape Architecture Awards for Excellence

## DOMIC

澳大利亚 昆士兰州 阳光海岸  
Sunshine Coast, QLD, Australia

模糊了景观和建筑的界限，将努沙国家公园置于建筑的顶部，将阳光海滩沙丘的景观类型与材质、颜色、栖息地和植被结合起来，产生原始的归属感。

DOMIC (俄语中圆顶屋的意思) 是一个远离都市的生态巢穴，位于努沙国家公园的入口处，俯瞰太平洋。房子依偎在沙丘中，屋顶和墙壁上覆盖着当地特有的天然植被。住宅为洞穴状，与自然和原始环境有着巧妙的联系。

项目探索了绿色屋顶和绿色墙体系统的定制设计和创新，使景观可以无缝地与建筑相结合。

DOMIC是一个独立的生态巢穴，将景观建筑置于高端住宅设计的主导地位。作为一个优秀的案例，通过设计，自然世界可以敏锐地融入到一个4层的建筑中，激发对这个地方的归属感，并保持一种自然的体验及惊奇和发现的感觉。

Blurring the lines between landscape and building - bringing the Noosa National Park over the top of the structure, integrating the landscape typologies of the Sunshine Beach sand dunes with materials, colours, habitat and vegetation to engender a primal sense of belonging to the place.

Domic (Russian for House of Domes), is an off-the-grid eco lair on the doorstep of Noosa National Park overlooking the Pacific Ocean. The house is nestled into the sand dune wrapping it's roof and walls in a blanket of natural vegetation endemic to the area. The abode is cave like and dramatically connected to the natural and primeval surroundings.

The project explored bespoke designs and innovations in green roof and green wall systems so that the landscape could be seamlessly integrated with the architecture.

Domic is a self-reliant eco lair that puts landscape architecture in the driving seat of high-end residential design. The project is a shining example of how, through design, the natural world can be sensitively integrated into a 4-storey building to provoke a sense of belonging to the place and to maintain a natural experience and sense of wonder and discovery.
